Undergraduate Certificate — Microsoft.net Applications | Wilmington University |Remote | 5/2024

Skills

Platforms & Tools: Unity, Visual Studio Code, Visual Studio 2022, XAMPP, Bootstrap 5, ReactJS
Programming Languages: C#, Java, JavaScript and JSX, HTML, CSS, some C++, PHP, Python

Software Development Projects

Benjiweb.com — Personal Project | 8/2024 - Present
- Built a live website with React, JavaScript/JSX, Bootstrap 5, CSS, and HTML.
- Leverage GitHub and Visual Studio Code to organize project and upload code.
- Deployed the website through GitHub Pages. Acquired the domain name through namecheap.com.

React Website — Innovative Web Development | 5/2024
- Coded a website using React, JavaScript/JSX, Bootstrap 5, CSS, and HTML
- Held data for the website via JSON Objects; organized and coded the project using Visual Studio Code.
- Combined and leveraged various bootstrap classes to improve visual aesthetics of the page.

Knight's Last Stand Unity Game — Intro to Game Programming | 5/2024
- Developed 3D, third-person wave-based survival game over a four-month period.
- Completed all functionality leveraging C#; downloaded art, sound, and physical assets from the Unity asset store.
- Issues arose with sound desync, unintentional damage multiplying, and other features not working as intended; debugged and polished game by reviewing code, identifying problem areas, and researching to understand and solve problems.

PHP & SQL Website —PHP Application Development | 5/2024
- Wrote a two-page website using PHP, HTML, SQL, very light CSS, and XAMPP.
- Coded website structure to allow a user to login and view records from a table of their choosing.
- Organized a minimal database for the site with MySQL.

Work Experience

Fulfillment Expert — Target |Milltown, NJ | September 2020 – Present
- Search, retrieve, and stow 10+ online batch orders per shift; plan and manage time to fulfill orders 90 mins.
- Analyze real-time inventory and customer data to drive successful batches and order completion.

- Navigate a fast-paced environment and interact with customers and team members; train new employees.

Sandwich Artist — Subway | Spotswood, NJ | 2017 – 2019
- Supported ~20 customers per shift; maintained organization, food safety, and handled ~$500 in cash.
- Trained 3 new employees and worked independently and on a team of 3 to provide excellent service.
